

Luca Pagliaro

Senior Software Engineer with 11+ years of experience in software development and 3+ years of experience as a team leader.

Catania, Italy - [Website](#) - [LinkedIn](#) - [Email](#) - (+39)3349743923

Spoken languages: Italian (Native), English (Professional)

Technical skills: JavaScript/TypeScript (pro), RxJS (pro), PHP (good), CSS/SASS/PostCSS (pro), React (pro), Angular (pro), Vue (good), Unit testing (Jest, Vitest) (pro), Node.js (pro), WordPress (pro), MySQL & MongoDB (good).

Senior Software Engineer @ [Daily.dev](#)

(07/2024 - **today**) - [remote, english first]

I maintain and develop the company's OSS repositories using Node.js and React/ Next.js.

I also lead the development of several features starting from writing technical kickoff to actively coding and tracking project progress. Keep a strong focus on improving performance and accessibility, working to reduce technical debt and create long-lasting solutions.

Tech stack: **[TypeScript, React, Next.js, TailwindCSS, Jest, Node.js, TypeORM, Docker]**

Senior Web Consultant @ Self-employee

(02/2022 - 07/2024) - [remote, b2b work]

As a contractor, I've worked on 10+ projects, including leading small teams of 3–4 members.

Examples of work done are: deliver a complex data dashboard; develop a solid and accessible design system for a bank; build several web applications and headless e-commerce platforms.

Additionally, I've worked as a coding coach/teacher, participating in several educational programs ([Edgemony](#), [Start2Impact](#), etc...) where I taught to 100+ developers TypeScript, React, and Angular from scratch.

Tech stack: **[TypeScript, Angular, Vue, React, Redux, NgRx, PHP, WordPress, Node.js, Jest, Vitest, Docker]**

Lead Web Engineer @ [The Wave](#)

(01/2019 - 02/2022) - [agile, hybrid, leading role]

I led a team of 12 web developers on projects, providing both technical leadership and active code development.

I had a focus on experimentation for new languages, patterns, CMS and libraries to be implemented in the company projects, aiming for better quality.

I coordinated and managed the whole web team and the sub-teams on multiple projects, gave technical support and performed code reviews on different stacks. I was in charge of the technical growth of the team; managed the budget for hiring and interviewed new team members.

Tech stack: **[TypeScript, RxJs, Angular, Vue, React, PHP, WordPress, Node.js, Jest, Docker]**

Senior Frontend Developer @ [Motorsquare](#)

(09/2017 - 01/2019) - *[agile, on site, leading role]*

Developed and maintained the startup's web/desktop applications in Angular, Vue.js and Electron. Applying all the good rules of web development such as client-side cache (also via database in browser), skeleton, accessibility.

Tech Stack: **[HTML, SASS, JavaScript, TypeScript, RxJs, Angular, Vue, Electron]**

Founder & CTO @ HereToday

(11/2015 - 08/2017) - *[agile, hybrid]*

Built a full-stack restaurant recommendation app that uses NLP to analyze reviews and pinpoint user preferences.

Designed and developed the landing page, web platform, and mobile app using cross-platform technology. Deployed the entire architecture on Microsoft Azure.

Tech Stack: **[HTML, LESS, SASS, JavaScript, Meteor.js, Angular, Ionic, Node.js, MongoDB, Azure (cloud)]**

Frontend Developer & UI Designer @ [LovePedia](#) / [eADV](#)

(01/2015 - 11/2015) - *[part-time, on site]*

In charge of the complete redesign and frontend development of the LovePedia portal. Built and implemented the UI components using mainly vanilla JS with a focus on performance and user experience.

Tech Stack: **[HTML, LESS, JavaScript, jQuery, PHP]**

WordPress Developer @ [Yithemes](#)

(09/2013 - 09/2014) - *[on site]*

Built and maintained themes and plugins for popular marketplaces (yithemes & themeforest), with a focus on performance, multi language compatibility and best practices. Provided remote support to customers, troubleshooting and resolving technical issues.

Tech Stack: **[PHP, MySQL, WordPress, JavaScript]**
